

March 21, 2018

Dear Members and Friends,

I would like to personally thank those that came to the county commission workshop meeting to support the Surf Sailors and to hear the proceedings about the sailing facility. I would also like to thank each one of our members on the executive committee for all the hard work preparing for the presentation, researching documentation, creating the slide show and the booklet that the commissioners received.

The county commission has charged the Surf Sailors and the master plan committee to get together and to come up with a mutually acceptable plan and has asked that the plan be delivered to the County Commission to be “voted up or down” at their meeting on April 19. I have personally spoken with Keyes Williamson, the lead designer, and have sent him our plans. I expect to hear back from him soon on possible plan modifications.

I urge everyone to allow the executive committee to do their work in forming a new plan with the master plan committee and the designer. Please refrain from side-show interviews with media or others and instead direct any inquiries about what we are doing to the office of the commodore. I will confer with our executive committee about our position on any questions.

Again many thanks to all.

Happy Sailing,

Robert C Ussery
Commodore
